Pair programming

It is a practice from Extreme Programming (predecessor to Agile) where two developers work simultaneously on the same code together.

TYPING IS NOT THE BOTTLENECK

Different roles

- Driver

- Navigator

Driver

- Tries to get to the point quickly

- Tries to be fast

IRON
HACK

Navigator

- Has more time to think

- Tries to be perfect

- Keeps a small TODO list so the pair does not lose focus

Some elder wisdom

Keep distractions away (refill your coffee)

IRON
HACK

Set your goal clearly

Always, always be nice
Use common sense
and etiquette

Share everything

Always, always be constructive

Do not hog the keyboard

(Ahem)
Do *NOT* hog the keyboard

IRON
HACK

Take frequent breaks

Different setups

- Two people one computer

- Two people two keyboards

- Two people two computers

#3: ARM PLACEMENT
